

East Haven Matters

easthaventogether@gmail.com

Volunteers Needed

Please let us know if you can help move some of the fishing waste from the back of the car park on Wednesday 27th March at 10am. Strong gloves will be provided to enable people to lift items into trailers and into a skip on the other side of the bridge. Keep Scotland Beautiful are going to send a few volunteers to help as they know how tough this winter has been for residents. Lunch will be provided. Please let us know if you can help in anyway.

EAST HAVEN BEACH CLEAN

Saturday 23rd March 10am

Meet at Heritage Point.

MCS Survey

Refreshments

East Haven

Exclusive Designer Jewellery

A London Based Jewellery Designer Company has embarked on a special project to celebrate Britain's mineral heritage. One beach has been selected from each part of the UK.

East Haven has been selected to represent Scotland. A small number of agates have been collected from the beach and will be turned into an exclusive selection of ten designer rings.

One ring will be donated to a Scottish Museum. Possibly the V&A. We will keep you informed!

Coastal Impacts

The entire Angus Coast has experienced significant impacts as a result of storms during the last six months. East Haven Together is working closely with the Scottish Government Coastal Adaptation Team, Angus Council, NatureScot and the Angus Climate Hub. This is to ensure that as a community we undertake the right interventions to conserve and protect the dunes and coastal environment. The best advice at the moment is to keep measuring the dunes, remove invasive *Rosa Rugosa* and plant native grasses. We are grateful for funding from the Royal Bank of Scotland regeneration fund and the Co-op to enable this to happen. Two significant studies/research are going to take place during this coming year which will help to guide and inform further interventions in East Haven. We will keep you informed.

Co-op Community Fund

Please encourage everybody to select East Haven as their chosen community group at the Co-op this year. Lynne and Nicola are going to host a stall and tombola in the store. If you have any items which could be used for the tombola please pass them to Lynne and Nicola.

FLOODING AND NETWORK RAIL

East Haven Together continues to work with all stakeholders to try and resolve flooding problems. Network Rail say they may have to leave their assets and pipe in place until nearer the end of the year. The railway line will have to close for the sink hole to be fully repaired. EHT has applied for a Resilience Grant to commission survey work and obtain independent advice.

GLASS RECYCLING

Angus Council plans to change the way we recycle glass has been delayed until the summer. Large glass recycling bins are being placed in all communities across Angus. EHT has worked closely with Angus Council to obtain the best solution for East Haven. The bin can't be placed in the beach car park. After consultation with residents we have negotiated a smaller, discreet bin which will be partly hidden from public view and placed near the green bin next to Dicks garage. It will be quite attractive and the area around it will be landscaped and improved.
